

ATTACHMENT A

Reissue Application No. 10/662,036 filed 09/11/2003

: Claim 1 of U.S. Patent 6,289,515 erroneously included the following limitation:

- - "a thumb portion of the outershell glove rotated forward in an arc of approximately 20 degrees from the plane of the finger portion of the outershell to conform to the chosen arc of the thumb portion of the mitten- -"

This limitation renders claim 1 partly inoperative in failing to cover a glove where the outershell glove is rotated forward in an arc other than approximately 20 degrees from the plane of the finger portion of the outershell.

Removal of this limitation from claim 1 will broaden the reissued patent to cover a glove where the outershell glove is rotated forward in an arc other than approximately 20 degrees from the plane of the finger portion of the outershell
